

Q-7. Please define "off specification." What makes the UFG out of specification (i.e. U236, TC-991)?

A-7. Any UF₆ not meeting ASTM Specification.

Q-8. Were the available data obtained from representative sampling and analysis or "process knowledge"?

A-8. Sampling and analysis

Q-9. What type of cylinders is the "off Spec" contained in?

A-9. 30B or 48A cylinders

Q-10. Are the cylinders in shippable condition?

A-10. Most of the Portsmouth off-spec UF₆ would meet DOT requirements for shipping. The Paducah cylinders have not yet been evaluated.
